Comparison among SRS of different companies

Comparison between IEEE and IBM SRS format:

The IBM SRS format is similar to IEEE SRS format with less number of fields. Every page of IBM SRS format requires project name, version, date and document identifier mentioned at the top of a page. It's introduction part is similar to the IEEE one but Overall description lacks product perspective, product functions, operating environment and user documentation. IBM format lacks information about external interface requirements, system features, business rules safety and security requirements. IBM format has extra information about Acronyms and Abbreviation used in the format. It includes supplementary requirements, supporting information, use-case reports and concerns/queries/doubts...

Comparison between IEEE and TCS SRS format:

TCS SRS format includes operating system that consists of SO Workstation, SA Workstation, TCS Server, Event Logger, Professional Data Processor fields. IT also includes details of development software, Application Software and Man-machine interfaces.
